

ExxonMobil Supported Uses - Finished Lubricants

Date Issued: March 2010

Generic Use Title														
GU 1			GU 2			GU 3			GU 4			GU 5		
Use of lubricants in vehicles or machinery			Application of lubricants without exposure to heat			Use of lubricants in high temperature open processes			Handling and dilution of metalworking fluid concentrates			Use of lubricants in high energy/high speed open processes		
General Scope														
Covers the use of lubricants/greases in a closed system (e.g. engines) including storage,transfer operations, maintenance activities and disposal of containers			Covers the use of lubricants without exposure to heat in open systems(e.g mould releases, corrosion protection, slideways) including storage,transfer operations, automated roller application or brushing of coatings, spraying activities, dipping, dripping and pouring activities and maintenance/cleaning operations			Covers the use of lubricants in open high temperature applications (e.g quenching oils, textile oils) including storage,transfer operations and the removal and treatment of spent/contaminated fluid			Covers concentrate transfer and dilution operations, sampling and disposal of containers			Covers the use of lubricants in high energy/high speed open processes (e.g metal working fluids/rolling oils) including storage,transfer operations, open rolling and annealing activities, open and contained cutting/machining activities, draining and working on contaminated/reject articles and disposal of waste oil
