

**Fuel Products**  
**REACH Pre-registration/Registration status**  
**December 2008**

In accordance with the provisions of the REACH regulation, ExxonMobil has pre-registered all the key fuel products which are currently manufactured by ExxonMobil refineries within the European Economic Area (EEA) or imported by Exxonmobil into the EEA. ExxonMobil has also been actively requesting confirmation from its suppliers that they are committed to meeting REACH requirements with respect to pre-registration and registration.

Consequently, ExxonMobil expects to be able to continue to supply customers with the fuel products they currently purchase. However, should there be any changes in our supply plans, we will inform our customers at the earliest possible opportunity.

ExxonMobil intends to register its current range of fuel products by December 2010.

More general information on REACH and petroleum products can be found on the Concawe website.
