

Fuel Products
REACH Registration status
November 2010

In accordance with the provisions of the REACH regulation, ExxonMobil has registered all the key fuel products which are currently placed on the market by ExxonMobil refineries within the European Economic Area (EEA) or imported by Exxonmobil into the EEA. ExxonMobil has also been actively requesting confirmation from its suppliers that they are committed to meeting REACH registration requirements.

Consequently, ExxonMobil expects to be able to continue to supply customers with the fuel products they currently purchase. However, should there be any changes in our supply plans, we will inform our customers at the earliest possible opportunity.

More general information on REACH and petroleum products can be found on the Concawe website (<http://www.concawe.org>).

ExxonMobil does not provide an Only Representative service for this range of products.

Note: ExxonMobil will not be liable for any damages resulting from the use of or reliance on this information.
